D E A R R E C R U I T E R ,

Whether it be in VS Code or in an assembly bay, I'm a builder of systems; I construct software solutions for clients, and I assemble grills, lawn furniture, and bikes for Lowe's and Walmart. As the result of prompt product replenishment and quality assurance, I increased profit for Lowe's by 3% in 2021 and by 6% in 2022.

I find Oracle's goal to provide tailored data solutions and languages in response to the high demand of innovative programming needs inspiring. Based on my three years of experience developing systems (virtual and physical), and my training in software development lifecycle at Trenholm Tech, I can assure with confidence that my expertise will expand the growth and achieve the financial goals in your institution, and here are a few of my current projects to illustrate why:

- Designing and delivering freelance user-centric online solutions to increase client's revenue and marketing visibility, including my personal portfolio site: mjokipro.com.
- Creating and updating coursework code in personal GitHub rep using key OOP languages and implementing version control methods (see link above).
- Continuing to research and implement familiar and foreign instruction languages in order to capitalize my contribution to financial growth of clients.

Feel free to reach out at your convenience; I invite further discussion in an interview or zoom meeting regarding how the growth and long-term goals of Oracle will benefit from my contribution. Links to online resources are above showcasing my up-to-date array of instruction sets, web pages, and other original media. I'm honored to provide references and letters upon request, and I'm excited to hear from you.

Sincerely,

Matthew Joki

P.S. I graduated Magna cum laude at Trenholm State Technical College.
